

# *Twinning*

**On the tenth anniversary of the twinning initiative between the towns of Notines and Gavignano and considering the principal criteria of this experience to be still valid, we would like to include the town of Malas in this venture.**

We the mayors of these three communities as freely elected representatives of our citizens proudly rise to the daily challenges of providing for the needs of our fellow citizens with whom we have a strong relationship with. Taking into consideration that our communities stem from the cradle of ancient civilizations which conquered their sense of liberty through lengthy arduous struggles. Considering that the making of history must include a vaster world, but this world cannot be considered humane if not in the measure that man is able to live in freedom. On this day we solemnly declare : to maintain a permanent tie between our municipalities and to promote exchanges between us, developing our understanding and celebration of our differences and our European fraternity; to unite our efforts to fulfill this objective in peace and prosperity which is the foundation of the European community to which we all belong.
